
Cap 17 (ENG VER)

Memories

There was a time skip that three weeks after S.D.J attacked Tessa, she was found unconscious in the snow, with her body bruised, and was taken in by the trio who found her, their names were

X Y and Z

While X protected their colony, Y and Z did the best they could to keep Tessa alive, the girl ended up being unconscious during those three weeks, being woken up by Z

After a conversation, Y and Z began to argue about what they would do with her.

X entered the room where Y and Z were

X: So, were you able to talk to that human?

Z: Yeah, more or less, she's still a little disoriented, I did the best I could to avoid having to amputate her arm, and it worked

Y: And... Did she say anything about what she was doing in that area?

Z hesitated

Z: I just said that she was at the JCJenson colony revolt, she said that the robots spared her life, or something like that, and that she was forced to go back and infect one of them with a virus that they created in the laboratory

X: What about who or what attacked her? Something?

Z: She only mentioned the name of a certain J...

X: It doesn't surprise me... the robots of that colony suffered too much, it is already expected that they would have the same behavior, especially the dissassembly drones...

Y: You told us once that they stole the design of a dismantling robot, that's why our company went bankrupt, is that true?

X: *sighs* Yeah, that's true, I remember seeing a robot with purple hair and red eyes being used as a test, nothing more than that

Z: So... What are we going to do? This virus that the human mentioned could have already done enormous damage to that colony! Or even get out of there

X: *thinks a little *... I'm going after this j, she can't go unpunished *he goes towards the door *

Y: What?! X, are you crazy?! We don't know what JCJenson's robots are capable of!

X: This drone attacking a pure-hearted human is unacceptable

Y: Going up is crazy, listen to me! She might try something against us, we've never seen JCJenson's drones!

X:...

Z: If you go, I'll go with you, will you watch Tessa while we patrol outside?

Y: ... Alright, Z!
